Bitdefender
Cloud Security for MSP

Cybersecurity

MUCH MORE THAN AN ANTIVIRUS

Did you know that even your wireless printer or your internet connected coffee machine make your infrastructure vulnerable to cyber-attacks and also need protection? Hackers and viruses know all your weaknesses but, thankfully, BitDefender knows them too. Much more than an antivirus; this cloud protection service will fortify your systems against targeted attacks with a revolutionary security layer and industry leading efficacy.

- Web-based security eliminated the need of hardware
- Protection against viruses, rootkits, malware, phishing
- Centralized management adaptable to all competency levels
- Two-way firewall with intrusion detection and prevention
- Automated updates, no user interference possible or needed.
- Confidential data protection and optional blocked transmission.
- Advanced heuristics, web filtering, search advisor and USB scanning to block all malware entry points.
- Automatically discovers unprotected systems

Remain free while protected!

Bitdefender Cloud Security for MSP is a powerfully simple security solution protecting your business, backed by an international team of experts working around the clock to prevent potential threats and keep up-to-date security against the ever-growing, always improved malware and breach techniques.
