CLOUD / LOCAL BACKUP

Hybrid Backup

Free Hybrid Backup solution with all online backups

Complement your cloud backup with a secure local storage for your data. Hybrid backup integrates cloud backup and local backup to deliver system recovery, rapid file restores, and disaster recovery.

With Hybrid Backup conveniently integrated into all of our online backup solutions, you can backup or restore several gigabytes of data within minutes. You can do local backups to any mapped drive or any external hard drives¹.

Moreover, Hybrid Backup secures your files with 256-bit AES encryption, with an optional private key that serves as an added layer of security. Means, even if your local backup is lost or stolen, no one can ever access your files. You can either perform local backup for all of your files as and when you please, or automate the process for regular data protection, by scheduling it.

1- With the Replica service : You need to own a Replica device. There no proactive supervision for local backup, except for Replica and MedicBackup when local supervision is selected.

IT CLOUD SOLUTIONS : CLOUD SERVICES PROVIDER SINCE 2005

Born in the cloud", IT Cloud was established in 2005 to provide Cloud backup services in the form of supervised Cloud solutions to MSPs. Boasts a network of over 500 partners-resellers country-wide and tens of thousands of daily backups is among the top service providers of secured online backup solutions and Microsoft cloud services in Canada. IT Cloud Solutions also stands at the forefront of the IT scene in terms of infrastructure and security.
