

CyberSecurity

Complete, highly accurate email security

What makes us different?

You need more effective protection against ransomware and spear phishing? Is your Anti-Spam blocking your legitimate messages? Are you receiving adequate support from your provider?

PERFORMANCE

Zerospam provides complete protection against all forms of harmful and undesirable email messages. This includes ransomware and all other types of malware, spear phishing, phishing, DOS attacks, messages containing dangerous links and harmful attachments, good old-fashioned spam and rogue newsletters.

SECURITY

Aside from successfully blocking dangerous messages, Zerospam offers a complete set of security features: built-in redundancy, confidentiality, automatic mail queuing if the client server goes down, on-demand email continuity, optional outbound filtering, TLS encryption by default and effective protection from your own users.

EASE OF USE

Cumulus, the Zerospam Client Interface, is very intuitive. Systems administrators love it and individual users can navigate it with ease. Smaller quarantines are much easier to manage.

LOW FALSE POSITIVE RATE

Blocking spam and dangerous messages alone does not define a great email filtering service. Making sure that legitimate messages are delivered is also key. When important messages concerning orders, contracts, warnings and opportunities are blocked, the consequences can be very serious.

A COMPLETE, DEADLY accurate and UTTERLY simple cloud email security solution

Ransomware protection

Zerospam quarantines malware propagated through disguised executable files and infected macros in Microsoft Office documents and scans every link to offer top protection against all forms of email-propagated ransomware. The Zerospam centralized quarantine further protects customers against their own users so dangerous quarantined messages won't be released.

Phishing and Spear phishing Protection

Special anti-phishing layer specific to banks, social media sites, Paypal and eBay. Excellent recognition of phishing messages. Advanced spearphishing protection included in the standard service cost.

Configuration

The Zerospam default setting offers optimal detection. The solution is built to maintain this performance with little or no customer intervention. Technical support is agile, competent, responsive, thorough and fast and FP and FN issues can quickly be resolved.
