

Add an **advanced layer** of protection against cyber threats to your productivity tools by upgrading to **Microsoft 365 Business Premium!**

Protect your business from cyber threats with a solution designed for SMBs

With **Intune**, secure, deploy, and manage your employees' devices and mobile apps. This gives you control over how your organization's devices are used.

With **Azure Information Protection** protect sensitive emails, documents, and data from accidental sharing with encryption, data classification with labels and other options.

With **Conditional Access** allow or deny access to your data and applications depending on when the employee logs in, his location and the applications he uses.

With **Windows Virtual Desktop**, the only virtualized solution fully optimized for Windows 10 and Office 365, access desktops from any device, from anywhere.

Protect yourself from malware, viruses, phishing scams, malicious links, and other threats with **Microsoft Defender Antivirus**.

Drive productivity with Universal Printing

Cloud-based printing solution allowing you to eliminate the need for a local print server.

In addition, **Microsoft 365 Business Premium** includes all the features of **Microsoft Business Standard**.
